

DESIGN 911

T R A D E

A SPECIALIST SERVICE FOR THE TRADE

DESIGN911 TRADE: FROM DESIGN911

KARL CHOPRA created DESIGN911 in 1995.

A true Porsche enthusiast with a sense for sourcing hard-to-get parts – from simple brackets to body panels – he turned a hobby of rebuilding, restoring and customising Porsches into a highly successful business offering customers a full range of OEM and aftermarket parts for general servicing and re-build as well as restoration and tuning for the European and world-wide markets.

Now, specifically for the motor trade, Karl has created DESIGN911 TRADE.

WELCOME TO DESIGN911 TRADE

FIRMLY established as a market leader, DESIGN911 has supplied private owners and specialist Porsche workshops (plus more than a handful of main dealers who appreciate our service) but we recognise the trade customer may require an extra special level of service, the highest level of availability, a flexible pricing structure, and the fastest possible delivery. For that reason we conceived DESIGN911 TRADE.

DESIGN911 TRADE aims to make the connection between the customer and the right part seamless. A dedicated trade link, telephone or internet, allows the customer to talk with someone who really understands what's required. The DESIGN911 TRADE system takes the hassle out of things, with next day free-of-charge delivery throughout the UK, a no-quibble warranty and an easy to set up credit system.

We claim to be the company that can supply 'every part for every Porsche' and work hard to achieve our objective. Indeed, if an item is not available from any supplier or no longer in manufacture, we'll look at ways to make it ourselves. We are the most complete Porsche parts organisation.

DESIGN911 TRADE is backed by over two decades of DESIGN911's experience of the world's most popular sports car. Our task is to identify a customer's needs, offer alternatives – OEM or aftermarket – when requested and supply them in the shortest possible time. We are aware that down-time on a project can be both annoying and costly.

Our mission is to forge a partnership with the trade customer to achieve the 'ultimate Porsche experience.'

trade discounts

THE MOST SIGNIFICANT NAMES

RECOGNITION does not come easy. We are proud to have earned our place amongst the top names in the exciting world of Porsche cars. Working to be the best in the highly competitive and critical world of sourcing and supplying replacement and specialist parts to trade customers, the team behind DESIGN911 TRADE has developed close working relationships with the biggest and most significant names in the business. The majority of the most respected names in everything that is Porsche are represented on the shelves of our warehouse.

Our performance and reputation has gained us sole representation rights to market and distribute the products of many of these companies. A position we hold with respect.

OVER HALF A MILLION PARTS

WE are hands-on at DESIGN911 TRADE. Service or replacement, stock or upgrade, original equipment or aftermarket, we can supply for any Porsche from our vast 34,000 sq.ft headquarters in Essex. Orders placed before 4pm are assured next-day UK delivery, free of charge.

We've examined each model close-up, nut and bolt, to ensure every product we sell fits properly and performs as it should. The most famous and respected brand names in the Porsche world are amongst the half million-plus parts on our shelves. The customer makes the choice. We pick, pack and dispatch anywhere in the world.

FROM 356 TO PANAMERA - CLASSIC TO MODERN

KEY FACTS

- **Dedicated trade line:**
GB +44 (0) 208 900 0900 NL +31 (0) 165 788 306
- **Warranty**
No quibble warranty swap-over on faulty products
- **Accounts**
Set up a credit account with us is quick and easy
- **Free next day delivery**
UK orders before 4pm we can get to you next day with no delivery charge.
- **Express shipping from our European distribution centre in the Netherlands.**
- **Exclusive trade discounts through our online trade portal.**

- YOUR CHOICE OF STANDARD OR BIGGER BORE PLENUM
- CAST ALUMINUM AND POLISHED
- HUGE INCREASE IN HP & TQ
- SMOOTHER AND MORE EFFICIENT AIR FLOW
- NO CEL LIGHTS AND NO ECU REMAP REQUIRED

THE SUPERIOR DESIGN OF THE IPD PLENUMS OPTIMIZE FLOW WHILE INCREASING AIR VELOCITY. PERIOD! THIS APPLIES TO ANY PORSCHE ENGINE, PRODUCING ANY LEVEL OF POWER. THE PATENTED "Y" DESIGN DELIVERS IMPRESSIVE PERFORMANCE GAINS FOR BOTH BONE-STOCK AND HIGHLY MODIFIED PORSCHEs. THE MORE EFFICIENT DESIGN OF THE IPD PLENUM WILL ALWAYS OUTPERFORM THE FACTORY AIR DISTRIBUTOR. THE FACTORY INTAKE WILL BECOME EVEN MORE DETRIMENTAL TO PERFORMANCE AS YOU INCREASE THE POWER AND TORQUE OUTPUTS. THE BIGGER THE POWER, THE BETTER THE IPD PLENUM PERFORMS.

PRODUCTS WITH OE QUALITY

Brembo braking systems chosen by the world best manufacturers as original equipment.

In compliance with European safety regulations, certified in observance of all the strictest international standards.

Brembo checks all phases of the production process: design, development, testing, casting, processing, assembly, distribution and assistance. The production of original components is carried out in productive site approved by the car manufacturers; in the same plants, Brembo also manufactures Aftermarket products that have the same high technological value as the original components.

Manufacturers of high quality exhaust systems, catalysts, heat exchangers, body panels, chassis repair panels, oil pipes, engine heat shields, service products and lighting.

Advanced Ignition Technology

with Old School Appearance and High Tech Electronics.

Perma-Tune manufactures electronic ignition systems that are period correct looking for vintage European cars while concealing the latest technology within. We offer both all new replica ignition system components and core exchange systems for the sake of authenticity.

Performance upgrades for your air cooled engine. Perma-Tune introduces Advanced Ignition Technology. Old school appearance hides high tech electronics that rivals the newest cars. Pair your smart phone to your vintage car and fine tune the engine for more performance.

PERFORMANCE DURABILITY SAFETY

REPLACEMENT PERFORMANCE SUSPENSION BUSHES, HIGH TEMPERATURE EXHAUST MOUNTS, CLOSED CELL FOAM AND PU BUMP STOPS.

**FOR THE ULTIMATE
IN BUSH PERFORMANCE!**

ULTIMATE PERFORMANCE MOTORSPORT TRACK AND RACE BUSHES OFFERING THE MOST PRECISE AND ACCURATE ALIGNMENT FOR YOUR CHASSIS.

If your requirements are purely for the ultimate in handling and chassis performance then the Black Series is for you.

POWERFLEX
Black Series
Designed for the Track – Ready to Race

Suspension Science, Made Easy.

Elephant Racing is the established global leader in design and manufacture of performance suspension products for Porsche cars.

Adjustable Drop Links

Our front and rear adjustable-length drop links allow you to eliminate preload of the swaybar for maximum performance.

- ✓ Maintenance-free precision rod ends
- ✓ Weather-sealed
- ✓ Light weight aluminum design
- ✓ Direct Bolt-on replacement

Spring Plate Replacement Bushings for 964

Our bushing replacement kit allows you to restore your original spring plates, without the high cost of complete replacement plates. Our product is modeled after the factory original bushings and similarly includes a spherical bearing encased in an outer elastomeric layer. The elastomeric layer provides noise and vibration isolation, similar to the OEM components.

QuickChange™ Camber Plates

- ✓ Fully weather sealed
- ✓ Adjust camber independent of caster
- ✓ Make track-side camber changes
- ✓ Adjust without a gauge
- ✓ Completely bolt on

IMS Bearing Upgrade Kit

Aluminum Alternator Fan

Drive Shaft Bearing Support Mount

Power Friction Clutch Disc

Committed to Quality Products and Eternal Solutions

European Parts Solution. Characterized by a firm and unwavering conviction, without compromise. It is what we stand for and how our products are made because our goal is not simply to replace your defective parts but to improve them.

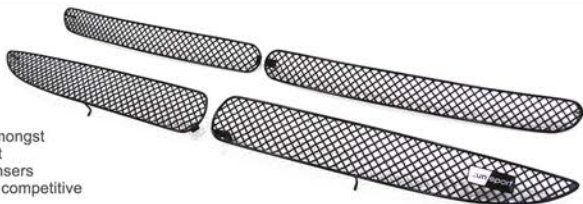

STYLED FOR PROTECTION

We concentrate all of our efforts on this product line. All Zunsport grilles are made from premium quality stainless steel wire mesh regardless of whether you choose to have a chrome, or a black finish

Every item is individually developed, using our unique prototyping techniques, specifically for the vehicle model to which it is to be fitted. Most of us do not put our vehicles through this extreme treatment but there are some amongst those that do who trust Zunsport to protect their radiators, condensers and brakes from damage in this competitive environment.

HIGH END HEAT EXCHANGERS AND EXHAUST SYSTEMS FOR PORSCHE 911

Materials and production methods from the aircraft industry are used to build up a product range with the highest quality standards.

- State of the art header design
- One piece header primary tubes
- Long life
- Higher power output
- Carbon monoxide safe
- Highly functional ducting
- Reduced installation time, enhanced vehicle value
- Designed with attention to detail to win on all levels
- Manufactured from the highest grade materials
- Expected to provide worry-free service for years

Put an end to leaks: with MEYLE-HD water pumps to beat frustration in the workshop!

**16 new MEYLE water pumps in HD quality
for numerous Porsche applications.**

**4-year guarantee
plus 100,000-miles
performance guarantee
for all MEYLE-HD water
pumps***

MEYLE-HD water pumps offer quality standards far higher than what can normally be found on the free market for components:

- Made in Germany
- Extremely hard-wearing mechanical seal in OE quality with SiC/SiC seal faces (silicon carbide) and high resistance to abrasive materials
- Housing seal resistant to high temperatures
- Water pump bearings in OE-equivalent quality
- Four-year guarantee on all MEYLE-HD parts plus 100,000 miles performance guarantee*

MEYLE steering and suspension parts – simply straightforward

With every new release modern cars are getting bigger and heavier, which puts steering and suspension components under ever higher stress. The frequent result: Increased part wear and shorter replacement intervals. MEYLE steering and suspension parts, including control arms, stabilisers, tie rod ends, bushings and hydraulic components, are carefully matched to maximise system performance. With uncompromising commitment to applying only the highest technical standards we prevent our spare parts from failing prematurely.

MEYLE is part of the road.

Passenger cars with MEYLE steering and suspension parts on board will perform more reliably and spend more time where they are supposed to be: on the road. This is what our customers expect of MEYLE – and what we expect of ourselves.

MEYLE-ORIGINAL

True to OE.

More than 24,000 spare parts for passenger cars, vans and trucks, quality-tested, robust, durable and tried and tested a thousand times over on the roads across the world – that's MEYLE-Original. Relying on our comprehensive product portfolio – offering everything from A for axial joint to Z for zinc-coated screw – customers can be sure that they will always have safety on their side.

BOGE

Your Partner
in Quality

With BOGE shock absorbers, workshops and customers are always on the safe side when it comes to quality. The technical characteristics are exactly tailored to the requirements of automotive manufacturers and are convincing thanks to high-quality materials and sophisticated machining processes.

BOGE shock absorbers guarantee highest safety and best comfort.

BOOT KITS

The best programme for every application

- › More than 40,000 car applications
- › For every specific application a boot kit to the OES standard
- › Reliable protection against damp and dirt
- › Optimum sealing and abrasion resistance
- › Manufactured according to DIN EN ISO 9001:2000

CONSTANT VELOCITY JOINTS

- › A constant velocity joint is a mechanical coupling in which the rotational speed of the output shaft is the same as that of the input shaft whatever the operating angle of the joint.
- › Joint kits contain all the individual parts needed for professional repairs: joint, boot, boot circlips, tightening straps, bolts, nuts, spacers, etc.

DRIVESHAFT

for every application

- › Our advanced driveshafts are the result of a continuing commitment to researching and developing new means to optimise and improve driveshaft performance, each fully supported by our long experience

OE MATCH[®]

CLASSIC

PRESERVING PORSCHE
- ONE PART AT A TIME -

OE Match is a brand that provides a wide range of Porsche components, from gaskets to suspension hardware, engine parts, and interior trim.

Over 3,400 individual part numbers, and over 8,000 OE cross-references catalogued, and are constantly developing new lines.

**2 YEARS
WARRANTY**

OE Match proudly provides a **two-year warranty on all parts**. Trust in our quality and performance as you upgrade your vehicle, and drive with confidence knowing your investment is protected.

Forged high performance pistons for various applications in nearly all engine types for racing and street use.

CONRODS

Forged high performance steel h-beam with arp-bolts optimal balanced suitable for all common models

Wössner
 HIGH PERFORMANCE PISTONS
 RESEARCH & DEVELOPMENT

**MANUFACTURER OF
 FORGED PISTONS**

We are the innovative specialists for high performance pistons and conrods. Our products are to be found in engines operating at the highest levels of motor sport, in competition, and of course, in everyday use - in fact, anywhere where longevity and operational noise are important factors

Wössner products are the source of the superior power behind the success of well known motor sport teams at national and international race meets.

MANN FILTER

What we do, we do right.

The best proof of this is the comprehensive MANN-FILTER product range: With our innovative air, oil, fuel and cabin filters, we offer a complete range of filters for all current engine types and machines - including an impressive service programme.

Discover the fascinating product world of MANN-FILTER - of course with original equipment quality.

MANN-FILTER - Perfect parts. Perfect service.

LIGHTWEIGHT ALUMINUM FLYWHEEL
FOR STREET AND RACING APPLICATIONS

Aasco Motorsports products are Designed and manufactured in the U.S.A. All of our flywheels are made in house in our facility in Anaheim California. We have the latest HAAS CNC machines and CAD-CAM software to engineer to the highest tolerances. We balance our flywheels in house as we as have a FARO Arm for quality control assurance.

California Motorsports has established themselves as the **leaders of Porsche transmission repair, rebuilding, service, support and development** for more than 3 decades. The continued success comes from the very own in house R&D, allowing them to produce **high quality transmission parts**.

They are an independent, family owned business comprised of a group of Porsche enthusiasts dedicated to offer you **the best quality products and services for your hard earned money**.

Their operations have expanded to include in house manufacturing of many of their own products such as **billet shift forks, bearing plates, side plates, cable shifters and other related parts engineered for racing and motor sport**.

UNIVERSAL. STRONG. SECURE. GET ...

planted.

SEAT BRACKET TECHNOLOGY

The Planted Seat Bracket is a vehicle specific bracket used as an adapter between the floor of the vehicle and an aftermarket seat and it's accessories. Because the floor of each vehicle varies and typically is not flat, a vehicle specific Seat Bracket is required for installing an aftermarket seat. planted creates each seat bracket using the floor of the vehicle as a reference.

- LASER CUT FROM 3/16 INCH THICK STEEL AND HAND WELDED
- PRE-SLOTTED WITH HOLE PATTERNS TO ACCEPT SLIDERS FROM MOST MAJOR SEAT MANUFACTURERS
- FINISHED WITH A BLACK POWDER COAT

ROAD & TRACK SUSPENSION FOR PORSCHE 964, 993, 996, 997, 991, BOXSTER AND CAYMAN

DFV

- DFV (DUAL FLOW VALVE)
- REBUILDABLE
- CORROSION SALT SPRAY TESTED (ISO 9227)
- 2 YEAR LIMITED WARRANTY
- HEIGHT ADJUSTABLE
- 20 MM LOWER THAN STANDARD

TTX

- TTX-TECHNOLOGY (TWIN TUBE)
- REBUILDABLE
- TWO-WAY ADJUSTABLE
- 2 YEAR LIMITED WARRANTY
- HEIGHT ADJUSTABLE
- 20 MM LOWER THAN STANDARD

Having long been regarded as the benchmark in high-performance road and track suspension across a wide range of performance and tuner cars, the Road and Track range brings Öhlins unparalleled competition knowledge and peerless build quality to the Porsche marque. The Öhlins Road & Track range for Porsche covers a major part of all 964, 993, 996, 997, 991 and 981 models with the Road & Track DFV shock absorber or the Road & Track TTX Shock absorber. The TTX is a GT3 shock absorber with all its qualities and championship titles. While the DFV is Öhlins unique Road & Track shock absorbers deliver increased performance and comfort compared to the standard Porsche suspension.

THE INDUSTRY LEADER IN FORGED RACING PISTONS

Designed for Air-cooled 911 engines compatible with a Nickel Ceramic bore, these pistons are machined from forged 2618 alloy for greater strength. The valve pockets are machined to accommodate high lift cams, and accept the stock stroke and rod length. The ring grooves are precision CNC machined and all applications include skirt coating and 3D undercrown milling.

KLASSIC LINE

KLASSICLINE – OEM products manufactured by the Original Equipment Manufacturer.
Guaranteed original equipment quality parts. KLASSICLINE is a brand supplying
OEM products at reasonable prices.

The art is in the detail

retroart

As technology evolves, so do the tools of the sculptor. Reproduced in detail never possible before, we liberate the air-cooled engine from its dark bay to take centre stage as a valued piece of art.

SACHS

Fast Installation, Highest Quality:
the SACHS Clutch kit with DMF and XTend.

SACHS clutches in OE quality get car drivers into gear easily. They ensure great convenience and are particularly reliable. SACHS clutches for passenger cars are also convincing due to their long service life.

SACHS

PERFORMANCE

Tuning Clutches

SACHS Performance Clutches:
Dynamic Driving for the Experts

SACHS Performance clutches are the first choice for demanding drivers who want to enhance their tuning cars. Different products can be used depending on driver requirements. Every performance clutch is a product of the concentrated expertise obtained from years of working in the motorsports industry.

As an equipment provider, SACHS has helped many motorsports teams to get to the podium. The expertise gained in the process has also been applied to SACHS tuning products. That is just one reason why performance tuning clutches are so extraordinarily resilient. This resilience guarantees a unique driving experience with maximum dynamics.

STABILUS

LIFT-O-MAT® Gas Spring

With accurately defined extension force and user-specific damping, the LIFT-O-MAT® gas spring provides optimum weight equalization, supports forces, lifts heavy loads, and swings lids and hoods. With its damping characteristics it ensures user-friendly movements.

Lifting, Lowering,
Moving and Adjusting

PROPERTIES AND ADVANTAGES

- Numerous sizes and force variants are available as standard products
- Linear spring characteristics for even force increase across the entire range of movement
- Upon request, progressive or decreasing spring characteristics for force supply at the beginning or end of the stroke
- Available with dynamic or hydraulic damping, depending on the application and installation orientation
- Different end fitting systems for fast and easy mounting
- For operating temperatures between -30°C and +80°C

SPIDAN®

Original GKN Parts

The SPIDAN range covers more than 75,000 vehicle applications including the most extensive range of coil-springs for European, Japanese and Korean passenger cars and light commercial vehicles.

SPIDAN coil springs are manufactured in OE factories and therefore match the original specifications of the vehicle manufacturers. Shape, dimensions and spring rate are identical to those of the original springs. SPIDAN coil springs are designed to fit with OE spring seats.

Very few aftermarket coil spring suppliers have access to the technology required to manufacture coil-springs from inconstant ("taper") wire. The SPIDAN range includes both: linear and progressive rate springs manufactured from constant or inconstant wire.

Braking, Steering and Suspension

TRW Aftermarket is a leader in the world for Original Manufacturer [OE] quality automotive safety products. Our Braking systems, Steering and Suspension parts, Commercial Vehicle components and Service Tools are legendary for their engineering quality and innovative design. They are also famously well tested, in-house and independently.

BLACK DIAMOND

A PASSION FOR EXCELLENCE

Performance Brakes

Black Diamond brake discs are made to the most exacting standards using computer aided design and computerised production whether you buy a Diamond X Drilled range for extra cooling, Diamond 6- & 12-Groove range for more instant response and greater friction or Diamond's award winning Combination range for extra cooling, extra friction and instant response you will always get Diamond's unique compound and extra heat treatment to provide you with awesome braking performance.

Stainless Steel Braided Brake Hose

Black Diamond hoses are made as close to OE specification as possible and many applications come complete with line locators using high specification hose with stainless steel over braid to hold the strength of the hose.

Using Black Diamond braided brake hoses will give you a superbly firm and controllable brake pedal action.

MOTORSPORT WHEELS

BRAID

A modern wheel with old school looks. These classic, Porsche specific wheels are MADE IN EUROPE in the original 911 offsets and backspacing plus custom offsets if required. Semi-forged construction with authentically accurate finish options, hub centric and with OE style ball seats. Light weight and strong and available up to 12" wide! BRAID's range of Porsche Classic wheels are designed to survive the rigors of competition but are equally at home on the street.

OE SUPPLIER SPORT SHOCKS ROAD & TRACK

ORIGINAL EQUIPMENT MANUFACTURER

The world's leading automobile brands trust BILSTEIN for a reason – our technologies and quality set the highest standards. Each development is a new milestone and represents the pioneering spirit of BILSTEIN, an essence which manifests itself in every product we manufacture.

THE RIGHT **SUSPENSION** FOR EVERY PURPOSE!

STREET COMFORT

*Easy to Use Products that
Improve Ride Comfort*

STREET PERFORMANCE

*Coilover Suspensions for Improved Looks
and Increased Driving dynamics*

TRACK PERFORMANCE

*Chassisport & Racing Suspensions to Achieve
the Fastest Possible Lap Time*

NRF is a leading manufacturer and supplier of cooling products for the Automotive Aftermarket. NRF is known for the production of high quality radiators, but is also specialized in a large range of other engine cooling, heating and air conditioning products.

STEERING WHEELS SEATS MOTOSPORT WEAR

100% HAND MADE IN ITALY

PRO-KIT Performance Springs

- World's leading Performance Suspension Spring System
- Engineered and tested to work perfectly with stock dampers
- First step towards a complete sport suspension system
- Lower center of gravity - lowers vehicle up to 40 mm
- Lowering = Traction + Attraction
- Progressive spring design
- Performance handling

DAYCO®

MOVE FORWARD. ALWAYS.™

We have the **best belt**
for every application.

HIGH PERFORMANCE AIR FILTERS

BMC air filters are designed and produced to ensure a higher air flow than original paper filters. In F1, for example, BMC cotton filters minimize the loss of air flow pressure passing through the air filter; this way ensures the best conditions for full exploitation of maximum power. Therefore the benefits of replacing the original paper filter with BMC cotton air filter, produced using the same technology and materials as the F1 air filters, are evident.

SPORT SPRINGS

H&R Sport Springs have been engineered to deliver improved handling and a lowered ride height while maintaining superb ride quality.

CUP-KITS

H&R Cup-Kits take the guesswork out of performance suspension selection by combining our famous Sport Springs with precisely calibrated shock absorbers.

COIL OVERS

H&R Sport H&R Monotube Coil-Overs offer race-bred performance without sacrificing ride comfort. Like all H&R coil-overs, these Monotube coil-overs feature a threaded shock body that allows virtually infinite ride height adjustments to suit street or track use.

STABILIZERS

H&R Sport H&R stabilizer bars are constructed from high-tensile steel with forged steel ends, and most bars are adjustable to suit your driving style and handling preferences. H&R stabilizer bars come with our proprietary urethane/Teflon composite bushings and are compatible with most OEM and sport suspension systems.

100% MADE IN GERMANY

GREAT PRODUCTS. GREAT VALUE.

AIC offers a comprehensive range of attractively priced spare parts corresponding to a vehicle's residual value. This means that vehicles can remain operational even in cases where a repair with original parts would no longer be an economically viable option.

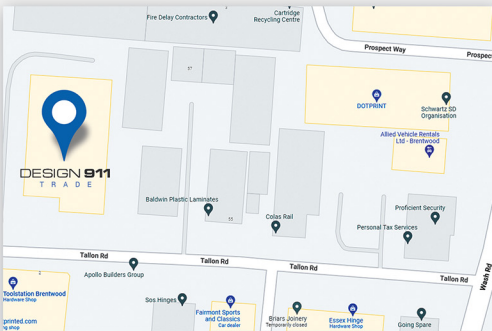

TRADITION. QUALITY. INNOVATION.

From alternators to Z-bars, from a tiny fuse to a complete axle beam: modern vehicles are becoming increasingly complex. Depending on the model and version, a total of more than 10,000 individual parts is no exception. And the higher the car's mileage, the higher the likelihood that one of these individual components will need to be replaced at some stage. As a used car's resale value drops quite rapidly, the cost of using original parts in such instances is relatively high. Sometimes too high for the repair to seem to make real economic sense. In such cases used parts priced in accord with a vehicle's residual value are a good choice - such as the great value AIC spare parts.
