**👁 Note!**

Before installing this product, check the contents of the kit. If anything is missing, please contact an Öhlins dealer.

**⚠ Warning!**

Before installing this product, read the Öhlins Owner's Manual. The shock absorber/front fork/steering damper is an important part of your vehicle and will affect the stability.

**Shock absorber for Porsche 911 Carrera 4/ Turbo (996)**

***POZ MN02 front***

**Mounting Instructions**

# MOUNTING INSTRUCTIONS

## **⚠ Warning!**

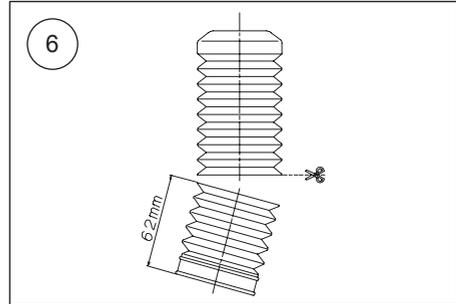

*It is advisable to have an Öhlins dealer install the shock absorber/front fork/steering damper.*

## **⚠ Warning!**

*If working on a raised vehicle, ensure it is securely supported so that it will not tip.*

## **👁 Note!**

*When working on this product, always see the Vehicle Service Manual for vehicle specific procedures and important data.*

**1**

Raise the vehicle, use jack stands.

**2**

Remove the front wheels.

## **👉 Caution!**

*Support the wheel hubs on each side of the vehicle not to damage the brake hoses.*

**3**

Remove the anti roll bar link and brake hose attachment.

**4**

Remove the brake caliper and support it not to damage the brake hose. We recommend to support the brake caliper with a piece of bent welding rod.

**5**

Loosen the lower and upper strut attachment bolts. Remove the original struts from the vehicle.

**6**

Cut the dust boot 62 mm from the lower end according to the figure.

# MOUNTING INSTRUCTIONS

7

Assemble the shock absorber according to the figure. Install the Öhlins McPherson struts on the vehicle according to the vehicle service manual.

## 👁 Note!

Open the rebound adjuster and compress the shock absorber. With the shock absorber compressed, close the rebound adjuster before installing it to the vehicle.

8

Position the anti roll bar bracket according to the figure.

9

Raise the wheel hub with a jack to ensure that the height adjuster is correctly seated on top of the hub carrier/upright.

10

Tighten:

Lower spring seat and lock ring: 50-60 Nm

Lock nut: 35-40 Nm

Anti roll bar bracket screw: 12-15 Nm

## 👁 Note!

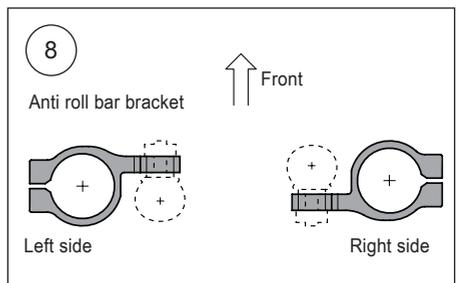

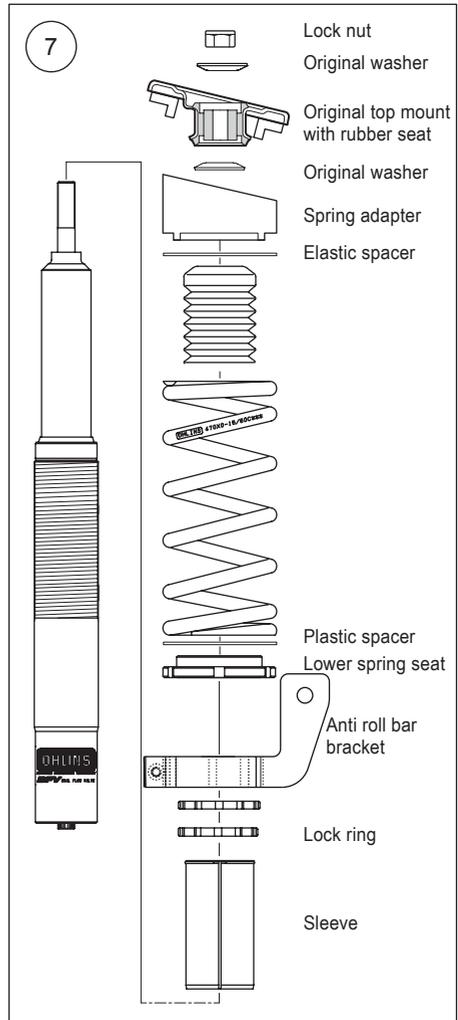

When tightening the top mount nut, the shock absorber shaft must be held in position with a 6 mm Allen key.

## 👋 Caution!

Ensure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber/front fork/steering damper when the suspension is fully compressed or extended.

11

Make sure that all removed parts are reinstalled in the same way as they were before the installation of the Öhlins shock absorbers.

# ADJUSTMENTS

## ⚠ Warning!

Before driving, always make sure that the basic settings made by Öhlins are according to recommended Set-up Data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.

## SETUP DATA
